How to Write a Strong Tech Resume??

Close the "Reality vs Perception" Resume Gap

The Role of a Resume

- > Perception: A history of your professional experiences
- > Reality: A marketing brochure to sell the reader on why they should interview you in person

Resume Scoring Criteria Grids

Tech

- > In work experience, super achievement
- > Tech Nerd = Logic & Analytic Skills highly correlated with coding ability
- > Super achieving
- > People Skill = Team player

What the reader is thinking

- > Are you able to take this responsibility?
- > Are you a loner?
- > Incapable of having friendly conversation with someone else?
- > Only able to function in a lab? While taking a test?
